mira safe coat

Artificial fibre strip / mat used as a carrying layer for the product **mira 4400 multicoat**

Characteristics
- flexible, tension - resistant
- open fibre structure allows absorption of **mira 4400 multicoat**

Use
10 cm wide strip is applied as a carrying layer for **mira 4400 multicoat** in wall corners, connections of floor and wall, joints between panels or elements, pipe or balustrade junctions, bathroom outlets etc. 100 cm wide mat applied as a carrying layer on floors ensures proper and uniform membrane thickness and results in quick drying.

Technical conditions
a. Fitting:
   Cut with sharp knife or scissors.

Technical data
Weight: 100 g/m^2
Thickness: 0,6 mm
Tension force (strip-test EN/ISO 10319):
- Longitudinal and transverse direction: 3 kN/m.
Break extension: 35/45 %

Packing:
Rolls dimension:
strip: - 10 cm x 25 m.
          10 cm x 100 m.
mat: - 100 cm x 10 m.
          100 cm x 50 m.

Storage and transportation:
Protect from sunrays.

Industrial safety:
Strip / mat contains no harmful substances, thus no special safety means shall be used.

Certificates:
PL: Hygiene Evaluation PZH No. HK/B/1885/04/98
